MOONSTROKE

LUNAR SKIN PROTECTION

MPF
500+

Soaring temperatures, a thinning atmosphere, and intensifying UV can age your skin - even at night. That's why we've created MoonStroke, the world's first MPF500+ cream that protects healthy skin in a changing climate.

The water-resistant formula gives you 12-hour peace of mind by deflecting moonlight and sealing out toxic pollutants to keep you looking radiant day and night.

Now microplastic and CFC free — Official sponsors of **Cop92**

Do not use as an alternative to personal protective equipment or biohazard suits. Always read the label.
